

PRODUCT DATA

Customized equipment to meet your specific requirements

Carver Transfer Press

- 12 Ton Clamping Force
- 1000 Pound Transfer Force
- 6" x 6" Heated Platens
- Electric Cartridge Heaters
- Digital Heat Control
- Two Hand Anti-Tie Down Operation of Transfer Cylinder
- Safety Shields for Clamp and Transfer Areas

This transfer press is based on the industry standard Model C. The Model C has been outfitted with a pneumatic transfer cylinder providing a compact, cost effective transfer design suitable for prototyping and limited production run applications. The transfer sections features a self-aligning chrome plated plunger with a 7cc injection capacity.

Clamp Section

Cylinder Type: Manual / Hydraulic

Force: 12 tons

Platens: 6" x 6" heated (350°F)

Daylight: 6"

Stroke: 5.1"

Overall Dimensions: 23" W x 20" D x 51" H

Approximate Weight: 550 pounds

Transfer Section

Cylinder Type: Two Hand Anti-Tie Down
Operation / Pneumatic

Force: 1000 pounds

Shot Size: 7cc

Consult factory for models with other clamping forces, transfer forces, injection sizes and other features
